EDUCATION

United Arab Emirates University Jan. 2021 – May 2025
Bachelor of Science in Computer Science, ***GPA: 3.97 / 4.00*** Al Ain, UAE

SKILLS

Languages: Python, TypeScript, JavaScript, SQL
Frameworks & Libraries: React, Next.js
AI & Machine Learning: Transformers, LLMs (Training, Fine-tuning, RAG), OpenAI/Gemini APIs, Docling
Cloud, Databases & Tools: AWS, PostgreSQL, Snowflake, Supabase, Qdrant, Docker, Nginx, PM2, Postman

EXPERIENCE

Mansoura Oct. 2025 – June 2026
Software Engineer - Data & AI Abu Dhabi, UAE

- Developed a full-stack platform using React, TypeScript, AWS, PostgreSQL, and Snowflake.
- Implemented secure authentication, backend APIs, role-based access control, document storage/generation, and scheduled cloud workflows.
- Automated operational report generation and integrated KPI forecasting.

ADIA Lab June 2025 – Sept. 2025
Machine Learning Research Intern Abu Dhabi, UAE

- Developed a transformer-based encoder to predict in-hospital mortality from converted EHR data, achieving high AUROC and Recall.
- Implemented attention and gradient-based methods to track and analyze feature importance.
- Built a ground-truth report generation pipeline converting raw EHR sequences into structured text summaries using LLMs.
- Fine-tuned an LLM for clinical report generation and explored alignment approaches to ensure factual grounding.

e& Jan. 2025 – Apr. 2025
AI Intern Dubai, UAE

- Integrated an AI-powered content recommendation tool with the Starz On Business platform.
- Developed a bespoke chatbot for Starz On Business to automate tier-1 customer support using platform guides and FAQs.

ATRC - STEM Youth Mentorship Program Nov. 2023 – Sept. 2024
Research Assistant Abu Dhabi, UAE

- Researched non-stationary contextual-bandit algorithms and large language models for recommender systems.
- Introduced change-point detectors to contextual bandit algorithms to enhance performance in stochastic environments.

PROJECTS

AwesomeRAG

- Full-stack RAG application featuring document upload, OCR processing, vector search, and agentic intent routing.
- Utilized locally-deployed Docling OCR with Gemini cloud fallback and Qdrant vector storage with EmbeddingGemma-300M.

OmniSpace

- Platform for organizing and semantically searching multimodal assets (text, image, video, audio).
- Developed using Next.js, Supabase, AWS S3, and Qdrant, using Gemini 3.1 Flash-Lite for conversational RAG.

NutriVision

- Mixed Reality application automating diet tracking by visually identifying food and calculating nutritional content.
- Trained deep learning models for weight estimation and YOLOv11 for real-time item detection.
- Secured 3rd place in the UAEU Innovation Challenge and presented at Expand North Star Dubai 2024.

PUBLICATIONS

- **DoS-based Fake Task Injection for Disrupted Sensing**, AICCSA, 2025.
- **Vault-PMS: A Vault-Based Password Management System**, IWCMC, 2024.

OPEN-SOURCE CONTRIBUTIONS

Deep-ML

- Contributed LeetCode-style problems focused on machine learning and linear algebra.
